Society of Women Engineers

EXPERTISE

Damage Analysis
Productivity Analysis
Technical Writing

Katie Winsor has more than 20 years of experience in the food and beverage manufacturing industry, with the majority of that time focused on process engineering, capital equipment expansion, and operations management.

Katie's experience in manufacturing includes engineering, operations, project management, commercialization, and Agile methodology. She has worked on large scale product lines, industry disruptive small batch launches, and legacy CPG food products. She has extensive knowledge and experience with manufacturing efficiency analysis & optimization. Additionally, Ms. Winsor has planned and executed project launches from product design through to market distribution including total cost estimating, process and facility design, equipment design, procurement, client and manufacturer alignment, project scheduling, and manufacturing execution. She has worked with and for some of the largest food & beverage companies in the world.

In her role at Aperture, Katie performs detailed data investigation for damage analysis and schedule delays. She consults on various construction projects in multiple industries, including manufacturing, residential and commercial construction, transportation and highway infrastructure projects and wastewater treatment facilities.

Ms. Winsor holds a B.S. in Biological Engineering from the University of Maine.

WORK EXPERIENCE

Aperture, LLC, (formerly The Sage Group), Denver, CO, December 2022 – Present, Consultant

Fresca Foods Inc., Louisville, CO, 2018 – 2021, Commercialization Manager and Project Manager

Fresca Foods Inc., Louisville, CO, 2016 - 2018: Senior Director of Technical Services

Fresca Foods Inc., Louisville, CO, 2012 - 2016: Director of Plant Operations

Nestle Purina PetCare Co., Davenport Iowa and Denver, CO, 2008 – 2012, Production Management

REPRESENTATIVE PROJECT EXPERIENCE – PARTIAL LISTING

- Conducted the damage analysis for arbitration related to the construction of an amusement park to be located inside an existing mall in California. The analysis included direct work impacts and extended duration costs from material escalation caused by Covid-19 impacts and pandemic stay at home orders that were consistently changing over the duration of the project.
- Supported the linear schedule analysis of earthwork activities related to the construction of a reservoir in Florida. The analysis included identifying multiple earthwork activities from the contractor's monthly schedule updates and identifying true critical path.

NOT FOR EXPERT DESIGNATION

- Supported the schedule and damage analysis for a water district's defensive claims by identifying process control irregularities and improper entitlement assertions from the contractor and suppliers.
- Assisted in the schedule and damage analysis report of a mine reclamation project using graphics creation supporting the contractor's entitlement from the owner.
- Assisted the contractor for a $1.2 billion highway infrastructure design-build project. Analyzed impacts to the contractor's progression of work, including late design and poor quality outcomes to identify responsible sub-contractor allocations and entitlement to claims.
